

AMATH Foundations – Software Based Math Literacy Solution – Licensing Overview

The unique licensing structure of AMATH Foundations makes it possible to provide a true literacy solution at a very low per user cost; approximately \$25 or less per student. As a true literacy solution, customers get more than just software. AMATH Systems, Inc. satisfies ever changing demands with a continually updated and improved product that is distributed regularly, at no additional cost. In addition, consulting services are provided to our users in order to help them evaluate student performance, correlate their performance to testing, improve their performance, and produce reports for administrators. This software based literacy product delivers mastery in high school level mathematics for around the cost of a workbook. To provide this software and service at a low cost, a two-component licensing system is utilized. For the cost of each component see <http://amath.com/foundations/price.html>.

Component 1: Site License or Individual Computer License/s

The Site/Computer License is a one time cost and includes:

- A license to run the AMATH Foundations on any computer at the site
- AMATH Foundations software for your server (and clients if needed)
- Product customization
- Administrative and Reporting software for accountability
- Product delivery
- Installation assistance and teacher training via online meeting.

Each Single Computer License includes the same components, but a separate license must be purchased for computer on which AMATH Foundations will run. This is a good option for schools interested in using AMATH Foundations on a limited scale.

Component 2: User License

Each student must have a valid User License to gain access to AMATH Foundations. It may not be transferred to another student or reset. A student who has been allocated a Student License may continue to access AMATH Foundations for as long as he/she remains at a school with a Site/Computer license.

Once a student graduates or moves on, his/her User License is removed from the pool of valid licenses. Many students use AMATH Foundations for several years. Additional User Licenses may be purchased for \$6-25 depending on quantity. Some schools elect to recover a portion of the cost by charging the students a nominal lab fee. Our cost has been adjusted to account for moderate turnover.

The Predictable, Low Cost per User License permits us to provide* :

- No annual or monthly renewal fees
 - Free software updates when available
 - Consulting Services (please review <http://amath.com/foundations/relationship.html>)
 - Ongoing Support and even backup recovery services
 - Training of new teachers
-

Product Delivery

We often distribute AMATH Foundations to schools the same day a purchase order is received. To minimize the potential for frustration, we require that an AMATH representative assist our customers' technology representatives with their first installation via a simple web meeting hosted by gotomeeting.com. Please review <http://amath.com/foundations/sysreq.html> for more information.

*Schools are eligible for free AMATH Foundations patches, upgrades, consulting, training, and support provided that they have User Licenses that are valid (unallocated or currently in-use). Customers that do not have valid licenses will be required to purchase User Level access to the software before any related services are provided. AMATH Systems, Inc. reserves the right to change pricing and licensing structure. This licensing structure is copyright © 1998-2008 AMATH Systems, Inc. – P.O. Box 4035 – Dublin, OH 43017 – (614) 798-8338 – sales@amath.com.
